BGAN Backup Plan

Oct. 2015

- Use **BGAN** as a backup of a **VSAT installation or terrestrial link**
 - When VSAT link/terrestrial line are down, BGAN automatically take over the traffic
 - **Business continuity**
- Available for **Class 1 and Class 2 terminals**
- **Fixed location** based on GPS coordinates (2 moves per year allowed)
- **12 months contract**
- **Global plan**
- **Usual BGAN Link FUP** (Fair Usage Policy)

- **Pay a fixed monthly fee** (access to the back up service) - Gives you 20 MB allowance
- And then: pay consumption according to usage (usage based on tresholds/levels of consumption)
 - From 20 to 999 MB
 - From 1,000 to 4,999 MB
 - From 5,000 to 9,999 MB
 - From 10,000 to 30,000 MB
- **Flexible service:**
 - Available in **case of emergency**
 - When **VSAT or terrestrial link fail**
 - Allows more frequent uses (no need for activation process, the BGAN is operational in few seconds if needed)

- **OptiCLOUD**

- IEC Telecom range of Value-Added Services
- Designed to improve user experience and satellite link management
- Optimize & control your traffic
- Deploy automatic backup solution for business continuity
- When VSAT is down, BGAN automatically take over the traffic

- **BGAN (Class 1 or Class 2)**
- **Fixed VSAT installation**
- **OneAccess WXB 360 deployed between BGAN & VSAT**
